

PRODUCT CARD
CHALK FILLER 277K
Product Description

Chalk filler produced on rLLDPE linear polyethylene matrix.

Main application

Mainly designed for extrusion, extrusion blow molding and injection molding processes. Dedicated product for film production, especially when using recycled polyethylene from consumer waste.

Characteristics

Characteristics	Unit	Value	Norm
Densitymethod A	g/cm ³	1,70 ÷ 1,75	PN-EN ISO 1183
Filling	%	≥ 75	PN-EN ISO 3451
Moisture	%	< 0,8	Own method
Melt Flow Index MFI	g/10min (230°/2,16kg)	1,0 ÷ 1,2	PN-EN ISO 1133
Color	-	White resultant	-
Average particle size	µm	ok. 2,5	-

The data on product properties are typical values provided for the information of the recipient.
